

## Foil Art

**You will need:** thick card, foil, (glue gun) or string, pencil, permanent markers, scissors, PVA glue, (template).

Draw your design onto the card. Or colour the back of the template in pencil, place the image on top of the card and draw over the design to transfer it.

Trace the design with the glue gun. Or use PVA glue and stick string on your line drawing. Let it dry.

Cover the whole image in PVA glue and stick a sheet of foil to it. Make sure to rub over the foil to bring out the details.

Colour the gaps with permanent markers.
