

INSTRUCTIONS

Foaming Monster

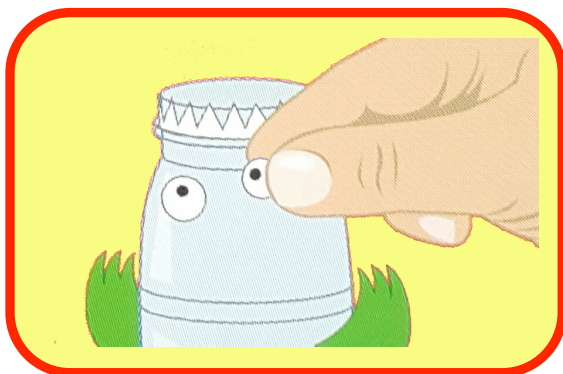

You will need: paper/card, plastic bottle, sticky tape, pens/pencils, scissors, PVA glue, spreader, vinegar, washing-up liquid, food dye, bicarbonate of soda, tissue, template, tray.

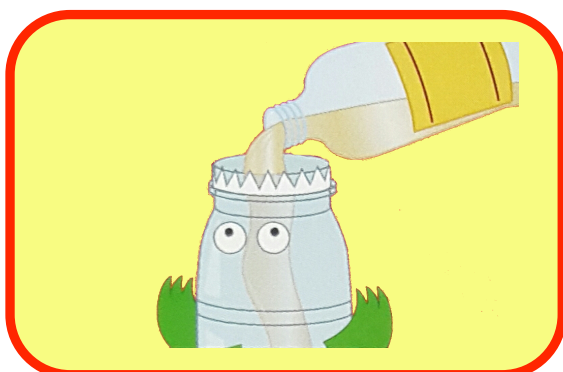

Colour and cut the monster's tail, teeth, legs and arms (and eyes if you don't have googly eyes).

Stick the tail, legs and arms to the bottle with sticky tape.

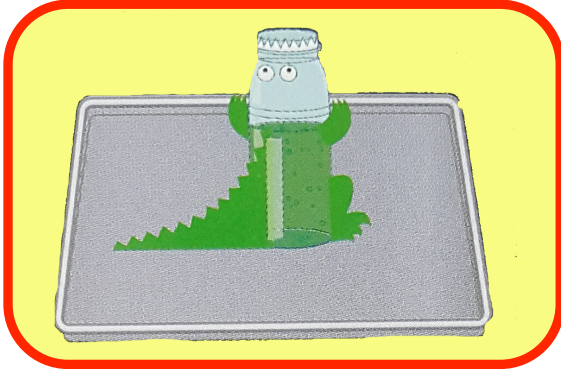

Stick the eyes and the teeth to the bottle with glue.

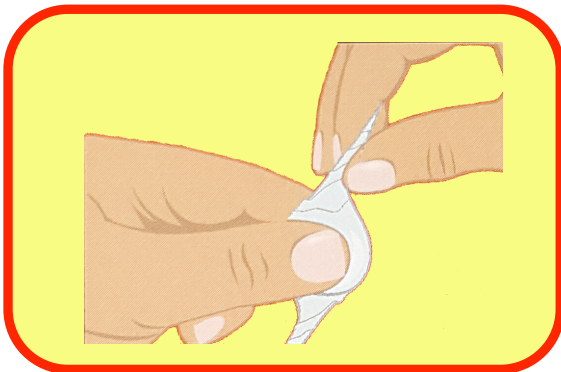

Half fill the bottle with vinegar and a good squirt of washing-up liquid. Add a little food dye for colouring.

INSTRUCTIONS

Foaming Monster

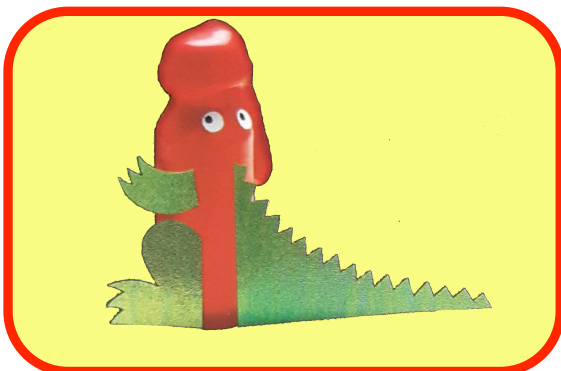

Gently swirl the bottle to mix the contents. Place the bottle in the middle of a tray or dish.

Put a heaped teaspoon of bicarbonate of soda in the middle of a square of tissue. Roll it and twist the ends.

Drop the tissue into the bottle. After a couple of minutes your monster's mouth will start foaming.

Print the template and repeat all the steps if the paper/card gets soggy and ruined.
